

1. HISTORY AND USES OF COMPUTER

Day-1

How Early Man Counted

For keeping the count of the things, man used things like bones, stones pebbles, sticks and even his fingers.

Many thousands of years later, man developed the number system. Many number systems had been developed but the most popular one was the decimal system.

EARLY COUNTING MACHINES

ABACUS - First counting device made by the Chinese people.

PASCALINE- A mechanical calculating device made by Blaise pascal.

DIFFERENCE ENGINE- A versatile mechanical calculator developed by Charles Babbage.

ENIAC- The first successful electronic computer. It was very large in size and generated a lot of heat.
